

Nugent Horse Trailer

After two years of intensive research and development, Nugent have brought to the market a truly innovative thoroughbred horse trailer.

Combining advanced technology with the finest of materials, the Nugent Horse Trailer is aesthetically impressive, but more importantly, it is built to last. Any horse owner will appreciate the exceptional attention to detail, such as the retractable folding jockey wheel and the curved front, which increases the space inside the trailer.

Visually appealing, spacious interior and an exceptionally solid tow... everything your horse deserves.

A stainless steel skeleton frame provides exceptional strength and durability

Heavy duty stainless steel ramp catches lock into place securely

Long-lasting stainless steel hitches, emphasise the quality of the Nugent Trailer

Lockable grooms door with aluminium latch, all features designed to last

Reinforced, integrated step suitable for mounting your horse

Spring catches allow the centre partitions to be removed with ease

Fully welded and galvanised chassis provides exceptional strength and stability

A grooms door retaining catch keeps the door firmly open on those windy days

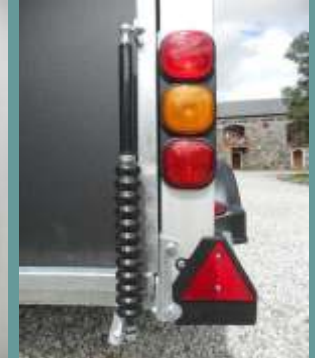

The self-retracting jockey wheel takes the inconvenience out of unhitching

The spare wheel is stored neatly on the front axle leaving more room inside

LED long life lights are fitted to each wheel arch as well as the top of the trailer

Sealed gas strut for ease of opening, and durable rubber light fittings

Breast bars can be safely released from outside the trailer - a vital safety feature

Adjustable breast bars to accommodate all shapes and sizes!

How well ventilated is the trailer?

Forced air vents with internal directional control provide a constant supply of fresh air, along with a spring loaded fresh air vent in the roof of the trailer.

What makes the Nugent trailer tow so smoothly?

The Nugent trailer uses a parabolic leaf spring which provides great shock abortion as well as helping to distribute weight evenly over the solid beam axles.

Can the matting be removed easily?

The lightweight aluminium floor is covered with a removable heavy duty matting which can be easily removed for cleaning.

What material is used for the partitions?

The centre partitions are constructed using composite board, which provides flexibility and durability, with the lower sections consisting of flexible rubber.

At Last! A Quality Professional Trailer
